Independent Auditors' Report

The Board of Regents
State of Iowa:

We have audited the accompanying balance sheets of the State University of Iowa, University of Iowa Hospitals and Clinics (UIHC) as of June 30, 2005 and 2004, and the related statements of revenues, expenses, and changes in net assets and cash flows for the years then ended. These financial statements are the responsibility of UIHC's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of UIHC's internal control over financial reporting. Accordingly, we express no such opinion. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

As discussed in note 1, the financial statements of UIHC are intended to present the financial position and the changes in financial position and cash flows of only that portion of the business-type activities of the State University of Iowa that is attributable to the transactions of UIHC. UIHC is a department of the State University of Iowa for financial reporting purposes. They do not purport to, and do not, present fairly the financial position of the State University of Iowa as of June 30, 2005 and 2004, and the changes in its financial position and its cash flows, for the years then ended, in conformity with accounting principles generally accepted in the United States of America.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of the State University of Iowa, University of Iowa Hospitals and Clinics as of June 30, 2005 and 2004, and the changes in its net assets and its cash flows for the years then ended, in conformity with accounting principles generally accepted in the United States of America.

As discussed in note 1, UIHC adopted the provisions of Governmental Accounting Standards Board Statement No. 40, *Deposit and Investment Risk Disclosures*.

The accompanying management's discussion and analysis on pages 3 through 8 is not a required part of the basic financial statements of UIHC, but is supplementary information required by the Governmental Accounting Standards Board. We have applied certain limited procedures, which consisted principally of inquiries of management regarding the methods of measurement and presentation of the supplementary information. However, we did not audit the information and express no opinion on it.

Management's Discussion and Analysis

June 30, 2005 and 2004

This section of the State University of Iowa, University of Iowa Hospitals and Clinics' (UIHC) annual financial report presents management's discussion and analysis of UIHC's financial performance during the years ended June 30, 2005 and 2004. The purpose is to provide an objective analysis of the financial activities of UIHC based on currently known facts, decisions, and conditions. Please read it in conjunction with UIHC's financial statements and the notes to the financial statements.

Overview of the Financial Statements

This annual report consists of two parts—management's discussion and analysis and the basic financial statements.

The financial statements (balance sheets, statements of revenues, expenses, and changes in net assets, and statements of cash flows) present, on a comparative basis, the financial position of UIHC at June 30, 2005 and 2004 (the end of the fiscal year), and the results of its operations and its financial activities for each of the years then ended. These statements report information about UIHC using accounting methods similar to those used by private-sector companies. The balance sheets include all of UIHC's assets and liabilities. The statements of revenues, expenses, and changes in net assets reflect each year's activities on the accrual basis of accounting, i.e., when services are provided or obligations are incurred, not when cash is received or paid. These statements report UIHC's net assets and how they have changed. Net assets (the difference between assets and liabilities) is one way to measure financial health or position. The statements of cash flows provide relevant information about each year's cash receipts and cash payments and classify them as to operating, noncapital financing, capital, and related financing and investing activities. The financial statements include notes that explain information in the financial statements and provide more detailed data.

Overall Financial Position and Operations

UIHC's net assets increased in each of the past two years with a \$35.7 million or 4.6% increase in 2005 and a \$17.0 million or 2.2% increase in 2004. UIHC reported an increase in operating income in 2005 and a decrease in operating income in 2004. Operating income in 2005 increased by \$21.0 million or 323.6% over the operating income reported in 2004. Operating income in 2004 decreased by \$5.2 million or 44.4% over the operating income reported in 2003. Nonoperating revenues decreased by \$2.3 million or 19.7% in 2005 compared to 2004. Nonoperating revenues decreased by \$3.7 million or 24.0% in 2004 compared to 2003. Table 1 provides a summary of UIHC's net assets as of June 30, 2005, 2004, and 2003.

TABLE 1
UNIVERSITY OF IOWA HOSPITALS AND CLINICS
Condensed Balance Sheet Information

(In thousands)

	<u>2005</u>	<u>2004</u>	<u>2003</u>
Assets:			
Current assets	\$ 198,480	208,087	205,307
Noncurrent cash and investments	336,364	323,782	311,498
Capital assets, net	433,365	403,954	366,290
Other assets	2,777	4,616	4,037
Total assets	<u>\$ 970,986</u>	<u>940,439</u>	<u>887,132</u>
Liabilities:			
Current liabilities	\$ 118,502	120,127	79,061
Long-term debt	31,218	33,298	35,670
Other long-term liabilities	2,191	3,686	6,043
Total liabilities	<u>151,911</u>	<u>157,111</u>	<u>120,774</u>
Net assets:			
Invested in capital assets, net of related debt	399,719	368,227	326,057
Restricted	12,437	14,763	16,805
Unrestricted:			
Designated by Board of Regents	323,917	308,807	294,304
Unrestricted	83,002	91,531	129,192
Total net assets	<u>819,075</u>	<u>783,328</u>	<u>766,358</u>
Total liabilities and net assets	<u>\$ 970,986</u>	<u>940,439</u>	<u>887,132</u>

A significant component of the change in UIHC's assets is the increase in capital assets. During 2005 and 2004, UIHC constructed or purchased \$80.7 million and \$83.5 million, respectively, of capital assets. The major capital asset additions included:

- Continuing construction of the new \$39.6 million Center of Excellence in Image-Guided Radiation Therapy
- Development of an Ambulatory Surgery Center and Procedure Suite
- Continuing construction of the renovation of the Pediatric inpatient units
- Development of the Perinatal and OB Care units
- Expansion of the Positron Emission Tomography Imaging Center
- Development of the Institute of Neurological Disease

**STATE UNIVERSITY OF IOWA,
UNIVERSITY OF IOWA HOSPITALS AND CLINICS**

Management's Discussion and Analysis

June 30, 2005 and 2004

- Development of the Intermediate Pulmonary Care Unit
- Emergency Treatment Center expansion and renovation
- Major equipment additions in 2005 consisted of radiology digital imaging and picture archiving systems, magnetic resonance imager, anesthesia machines, replacement lithotripter, and health care information systems upgrades

Debt

At June 30, 2005, UIHC had \$33.6 million in revenue bonds and capital lease obligations outstanding. During 2004, UIHC issued \$2.9 million of long-term debt. The proceeds of the debt were used to fund, in part, the construction and renovation of UIHC's facilities.

Operating Results and Changes in Net Assets

In 2005 and 2004, UIHC's net assets increased by \$35.7 million and \$17.0 million, respectively.

Excess of revenues over expenses before transfers	36,823	18,129	26,986
Net transfers out	<u>(1,076)</u>	<u>(1,159)</u>	<u>(1,136)</u>
Increase in net assets	35,747	16,970	25,850
Net assets, beginning of year	<u>783,328</u>	<u>766,358</u>	<u>740,508</u>
Net assets, end of year	<u>\$ 819,075</u>	<u>783,328</u>	<u>766,358</u>

Net Patient Service Revenue

Net patient service revenue increased from 2004 to 2005 by \$34.2 million or 5.7% and \$43.3 million or 7.7% from 2003 to 2004. The increases in net patient service revenue were driven by both increases in patient volumes and pricing increases during the same periods. During 2004, acute admissions increased 1,280 or 5.3% from 24,104 to 25,384 admissions. During 2005, acute admissions decreased 321 or 1.3% from 25,384 to 25,063 admissions. The Hospital experienced increases in outpatient services during both years.

**STATE UNIVERSITY OF IOWA,
UNIVERSITY OF IOWA HOSPITALS AND CLINICS**

Management's Discussion and Analysis

June 30, 2005 and 2004

The State of Iowa (the State) has made annual grants to UIHC to care for certain uninsured or underinsured individuals as well as to provide psychiatric services and services to children with disabilities. This funding also helps to assure that a sufficient patient base exists at UIHC to support health professionals' education. During 2005 and 2004, UIHC received \$40.7 million and \$40.8 million, respectively, from the State which is reflected in net patient service revenue.

Charity care is also provided to certain other patients in accordance with UIHC's charity care policy. Charity care to indigent patients under Chapter 255 increased from \$64.1 million in 2003 to \$76.1 million in 2004 and to \$86.6 million in 2005.

The provision for bad debts (a deduction from gross patient charges) increased \$7.7 million from \$49.7 million in 2004 to \$57.4 million in 2005. The provision increased \$21 million in 2004 from \$28.7 million in 2003 to \$49.7 million in 2004. The large increase in the provision from 2003 to 2004 resulted from further detailed analysis of accounts receivable balances subsequent to the implementation of a new patient accounting system.

Operating Expenses

Total operating expenses increased 2.3% from \$632.0 million in 2004 to \$646.6 million in 2005 and 8.5% from \$582.6 million in 2003 to \$632.0 million in 2004. The largest increases in expenses during these years are attributed to salaries and benefits, depreciation, and in 2004, medical supplies and drugs.

During 2005 and 2004, total UIHC salaries and benefits increased 5.7% and 10.6%, respectively, over the prior year levels. The increases primarily relate to salary increases along with increases in employee benefits. In addition, included in the supplies and general expenses is an additional \$2.2 million in 2005 and \$8.6 million in 2004 for temporary agency staff. Temporary agency staff, primarily nurses, is being used because of the current shortages of professional nurses. UIHC has chosen to use temporary staff rather than close various inpatient units in order to maintain patient access to tertiary care. Initiatives to reduce the use and cost of temporary agencies include development of a master contract to better manage the cost, incentives for UIHC staff to work additional hours and several other recruitment initiatives to attract more hires.

Transactions with Related Parties

UIHC purchases certain administrative and supervisory services, utilities, and other general services from the University. These services are purchased at the approximate cost incurred by the servicing unit. For the years ended June 30, 2005, 2004, and 2003, UIHC expensed approximately \$79.5 million, \$75.7 million, and \$69.7 million, respectively, for these administrative services, utilities, and other services and support requirements.

UIHC also provides certain administrative services to units of the University particularly to the Roy J. and Lucille A. Carver College of Medicine (College of Medicine). These services include billing, collection, and other physician practice-related clinic overhead expenses. For the years ended June 30, 2005, 2004, and 2003, UIHC received revenue from these units of approximately \$27.3 million, \$23.6 million, and \$22.9 million, respectively, for these services.

**STATE UNIVERSITY OF IOWA,
UNIVERSITY OF IOWA HOSPITALS AND CLINICS**

Management's Discussion and Analysis

June 30, 2005 and 2004

UIHC and the College of Medicine have formed a nonprofit corporation, University of Iowa Health System (UIHS), to enhance and support the educational missions of UIHC and the College of Medicine, particularly as these missions apply to clinical activities and statewide and multi-state network development activities. UIHC provided capitalization of UIHS through a transfer of funds of \$0.7 million for the year ended June 30, 2003. No funds were transferred in 2005 and 2004. UIHC also transferred \$0.9 million to the University's College of Medicine in support of clinical programs for the years ended June 30, 2005 and 2004.

Nonoperating Revenues and Expenses

Nonoperating revenues consist primarily of gain (loss) on disposals of capital assets, investment income and gifts and bequests. Investment income increased from 2004 to 2005 by \$4.9 million or 80% and decreased \$10.1 million or 62% from 2003 to 2004. The decrease in investment income during 2004 was the result of lower investment returns and unrealized losses. During 2005, UIHC recorded a net unrealized loss on investments of \$1.6 million, which decreased investment income accordingly. This compares to the unrealized loss of \$4.5 million in the previous year.

Contacting UIHC's Financial Management

This financial report provides the citizens of Iowa, our patients, bondholders, and creditors with a general overview of UIHC's finances and operations. If you have questions about this report, please contact Mr. Anthony DeFurio, Associate Director and Chief Financial Officer, University of Iowa Hospitals and Clinics, 200 Hawkins Drive, 1352 JCP, Iowa City, Iowa 52242-1009.

Noncash investing activities:

 UIHC held investments at June 30, 2005 with a fair value of \$400,675,408. During 2005, the net decrease in the fair value of these investments was \$1,626,106.

See accompanying notes to financial statements.

**STATE UNIVERSITY OF IOWA,
UNIVERSITY OF IOWA HOSPITALS AND CLINICS**

Notes to Financial Statements

June 30, 2005 and 2004

(1) Summary of Significant Accounting Policies and Related Matters

(a) Reporting Entity

For purposes of this report, the State University of Iowa, University of Iowa Hospitals and Clinics (UIHC) includes the healthcare units of the University of Iowa, which are generally referred to as the University Hospital, the Psychiatric Hospital, and the Center for Disabilities and Development. UIHC is part of the University of Iowa (the University), which is owned and operated by the State of Iowa under the supervision of the Board of Regents, State of Iowa (the Board) and is treated as a department for financial reporting purposes.

UIHC includes substantially all of the healthcare provider activities for patient care associated with the University other than the physician and dentist services and research activities provided by the faculties of the University's Colleges of Medicine and Dentistry. Student Health Services, Specialized Child Health Services outreach programs, and the University of Iowa Health System, a UIHC affiliate, are not included in this report.

UIHC is a comprehensive tertiary care referral center located in Iowa City, Iowa, offering a full range of clinical services in substantially all specialties and subspecialties of medicine and dentistry. UIHC serves as a resource for the state's primary and secondary healthcare providers. Patients are primarily from Iowa.

(b) Basis of Presentation

UIHC uses enterprise fund accounting. Revenues and expenses are recognized on the accrual basis using the economic resources measurement focus. Based on Governmental Accounting Standards Board (GASB) Statement No. 20, *Accounting and Financial Reporting for Proprietary Funds and Other Governmental Entities that Use Proprietary Fund Accounting*, as amended, UIHC has elected to apply the provisions of all relevant pronouncements of the Financial Accounting Standards Board (FASB), including those issued after November 30, 1989, that do not conflict with or contradict GASB pronouncements.

In fiscal year 2005, UIHC implemented GASB Statement No. 40, *Deposit and Investment Risk Disclosures*. GASB Statement No. 40 addresses disclosures on deposits and investments, focusing on common investment risks related to interest rate risk, credit risk, custodial credit risk, foreign currency risk, and concentration of credit risk. This pronouncement requires additional disclosures to be presented in the notes but had no impact on the net assets of UIHC.

(c) Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

**STATE UNIVERSITY OF IOWA,
UNIVERSITY OF IOWA HOSPITALS AND CLINICS**

Notes to Financial Statements

June 30, 2005 and 2004

(d) Cash and Investments

Cash and investments of UIHC include specific investments and other cash and investments that are pooled with the cash and investments of the University and held in the name of the University. UIHC's share of pooled investments and income thereon are determined on a pro rata basis reflecting UIHC's amounts available for investment as compared to the amounts for the overall University.

Cash equivalents totaling \$6,034,286 and \$5,875,881 at June 30, 2005 and 2004, respectively, represent money market funds and other short-term investments that mature in three months or less from date of purchase.

(e) Inventories

Inventories consist primarily of medical and surgical, pharmaceutical, dietary, and other supplies. Inventories are stated at the lower of cost or market, with cost determined on the first-in, first-out or weighted average basis.

(f) Capital Assets

UIHC's capital assets are reported at historical cost. Contributed capital assets are reported at their estimated fair value at the time of their donation. All capital assets other than land are depreciated or amortized (in the case of capital leases) using the straight-line method of depreciation using these asset lives:

Buildings and leasehold improvements	10 to 40 years
Infrastructure and land improvements	5 to 20 years
Equipment and software	3 to 10 years

(g) Costs of Borrowing

Except for capital assets acquired through gifts, contributions, or capital grants, interest cost on borrowed funds during the period of construction of capital assets is capitalized as a component of the cost of acquiring those assets. Interest costs capitalized for the years ended June 30, 2005 and 2004 were \$1,484,638 and \$1,486,482, respectively.

(h) Grants and Contributions

From time to time, UIHC receives grants from the University, as well as contributions from individuals and private organizations. Revenues from grants and contributions (including contributions of capital assets) are recognized when all eligibility requirements, including time requirements, are met. Grants and contributions may be restricted for either specific operating purposes or for capital purposes. Amounts that are unrestricted or that are restricted to a specific operating purpose are reported as nonoperating revenues. Amounts restricted to capital acquisitions are reported after nonoperating revenues and expenses.

**STATE UNIVERSITY OF IOWA,
UNIVERSITY OF IOWA HOSPITALS AND CLINICS**

Notes to Financial Statements

June 30, 2005 and 2004

(i) *Restricted Resources*

When UIHC has both restricted and unrestricted resources available to finance a particular program, it is UIHC's policy to use restricted resources before unrestricted resources.

(j) *Net Assets*

Net assets of UIHC are classified in three components. Net assets invested in capital assets net of related debt consist of capital assets net of accumulated depreciation and reduced by the current balances of any outstanding borrowings used to finance the purchase or construction of those assets. Restricted expendable net assets are noncapital net assets that must be used for a particular purpose, as specified by creditors, grantors, or contributors external to UIHC, including amounts deposited with trustees as required by bond indentures. Unrestricted net assets are remaining net assets that do not meet the definition of invested in capital assets net of related debt or restricted.

(k) *Operating Revenues and Expenses*

UIHC's statements of revenue, expenses, and changes in net assets distinguishes between operating and nonoperating revenues and expenses. Operating revenues result from exchange transactions associated with providing healthcare services—UIHC's principal activity. Nonexchange revenues, includes taxes, grants, and contributions received for purposes other than capital asset acquisition, are reported as nonoperating revenues. Operating expenses are all expenses incurred to provide healthcare services, other than financing costs.

(l) *Net Patient Service Revenue*

UIHC has agreements with third-party payors that provide for payments to UIHC at amounts different from its established rates. Payment arrangements include prospectively determined rates per discharge, reimbursed costs, discounted charges, and per diem payments. Net patient service revenue is reported at the estimated net realizable amounts from patients, third-party payors, and others for serviced rendered, including estimated retroactive adjustments under reimbursement agreements with third-party payors. Retroactive adjustments are accrued on an estimated basis in the period the related services are rendered and adjusted in future periods as final settlements are determined.

(m) *Charity Care*

UIHC provides care to patients who meet certain criteria under its charity care policy without charge or at amounts less than its established rates. Because UIHC does not pursue collection of amounts once determined to qualify as charity care, they are not reported as revenues in the accompanying statements of revenues, expenses, and changes in net assets.

(n) *Compensated Absences*

UIHC employees accumulate vacation and sick leave under the provisions of the Code of Iowa. Under the state's policy, accrued vacation benefits are paid at an employee's regular hourly rate when used or are paid upon retirement, death, or termination with certain exceptions. Sick leave is paid in a similar manner when used or to a maximum of \$2,000 upon retirement. These benefits are accrued in the financial statements as earned by UIHC employees.

**STATE UNIVERSITY OF IOWA,
UNIVERSITY OF IOWA HOSPITALS AND CLINICS**

Notes to Financial Statements

June 30, 2005 and 2004

Retirement benefits are provided to employees primarily through a defined contribution retirement plan. UIHC funds its obligation to the retirement plan on a current basis, as earned by its employees.

(o) Income Taxes

UIHC, as part of the University, is exempt from Federal income taxes, pursuant to Section 115 of the Internal Revenue Code. As such, UIHC is subject to income taxes only on unrelated business income under the provisions of Section 511 of the Internal Revenue Code.

(p) Reclassifications

Certain amounts included in the 2004 financial statements have been reclassified to conform to the 2005 presentation.

(2) Deposits and Investments

In accordance with the Code of Iowa, investments may consist of obligations of the following: U.S. Government and its agencies, certificates of deposit, prime bankers' acceptances, commercial paper, repurchase agreements, investments authorized by the Iowa Public Employees' Retirement System (IPERS) in Section 97B.7 of the Code of Iowa, an open-end management investment company organized in trust form registered with the Securities and Exchange Commission under the Investment Company Act of 1940, and the Common Fund for Nonprofit Corporations.

UIHC's cash and investments include specific investments and amounts pooled with cash and investments of the University and held in the University's name. UIHC's cash deposits at June 30, 2005 and 2004 were entirely covered by federal depository insurance or by the State Sinking Fund in accordance with Chapter 12C of the Code of Iowa. Chapter 12C provides for additional assessments against the depositories of the pool to ensure there will be no loss of public funds.

Noncurrent cash and investments limited by bond resolutions or designated by the Board were held for the following purposes at June 30, 2005 and 2004:

	2005	2004
Limited by bond resolutions:		
Debt service reserve	\$ 2,708,709	2,708,709
Debt retirement and interest sinking funds	967,209	1,070,547
Designated by Board of Regents:		
Capital projects and equipment and other needs	2,441,249	4,560,905
Surplus	321,767	350,164
Improvement, extension, and repair, operation, and maintenance funds	321,153,852	303,895,972
Restricted by donors	8,770,941	11,195,603
	\$ 336,363,727	323,781,900

**STATE UNIVERSITY OF IOWA,
UNIVERSITY OF IOWA HOSPITALS AND CLINICS**

Notes to Financial Statements

June 30, 2005 and 2004

Funds for improvement, extension, and repair, operation, and maintenance shall be used to pay costs of operating and maintaining the hospital system whenever other funds are not sufficient and for improvements, extensions, and repairs. Noncurrent cash and investments include designated assets set aside by the Board for future facility infrastructure improvements, equipment, and technological needs, over which UIHC retains control and may, at its discretion, subsequently authorize its use for other purposes. The funds are invested in investment-grade long-term fixed income and in certain high quality equities through the University's pooled investment funds.

Cash and cash equivalents and short-term investments specifically identified or pooled with the cash and investments of the University totaled \$64,311,681 at June 30, 2005. Cash equivalents designated by the Board of Regents totaled \$49,930,492 at June 30, 2005. This information was not readily available as of June 30, 2004, and therefore, has not been disclosed.

**STATE UNIVERSITY OF IOWA,
UNIVERSITY OF IOWA HOSPITALS AND CLINICS**

Notes to Financial Statements

June 30, 2005 and 2004

UIHC's investments are recorded at fair value, as determined by quoted market price. As of June 30, 2005, UIHC had the following investments and quality credit ratings:

	<u>Market value</u>	<u>Effective duration</u>	<u>Quality rating</u>
University of Iowa Long-term Endowment Pool:			
Cash and cash equivalents	\$ 207,458		AAA
U.S. obligations	560,643	9.72	AAA
Agency securities	14,504	11.70	AAA
Corporate issuance	1,421,541	3.81	A+
Mortgage-backed securities	3,108,709	2.67	AAA
Mutual funds—fixed income	5,264,517	3.54	AA
U.S. equity	23,358,070		
International equity mutual fund	2,547,853		
Subtotal fixed income	<u>36,483,295</u>		
University of Iowa Intermediate (Quasi II) Endowment Pool:			
Cash and cash equivalents	924,598		AAA
U.S. obligations	2,925,583	10.11	AAA
Agency securities	87,107	11.70	AAA
Corporate issuance	8,268,505	3.80	A+
Mortgage-backed securities	17,187,055	2.69	AAA
Mutual funds—fixed income	29,711,411	3.54	AA
Subtotal fixed income	<u>59,104,259</u>		
University of Iowa Operating Investment Pool:			
Cash and cash equivalents	113,110,117		AAA
U.S. obligations	16,648,448	1.20	AAA
Agency securities	45,342,976	1.10	AAA
Corporate issuance	98,954,072	1.28	A+
Mortgage-backed securities	31,032,241	1.08	AAA
Subtotal fixed income	<u>305,087,854</u>		
Total investments	<u>\$ 400,675,408</u>		

The effective duration and credit ratings on investments as of June 30, 2004 was not readily available, and therefore, has not been disclosed.

**STATE UNIVERSITY OF IOWA,
UNIVERSITY OF IOWA HOSPITALS AND CLINICS**

Notes to Financial Statements

June 30, 2005 and 2004

Interest Rate Risk—Interest rate risk is the risk that changes in interest rates will adversely affect the fair value of an investment. The maximum duration of the University’s operating portfolio may not exceed the duration of the Merrill 1-3 year Government/Corporate Index by more than 20%. At time of purchase the effective maturity of securities in the operating portfolio cannot exceed sixty-three months. There is no explicit limit on the average maturity of fixed income securities in the endowment portfolios. The effective duration of each fixed income portfolio shall be within a range of plus or minus 25% of the duration for that portfolio’s established benchmark.

Credit Risk—Credit risk is the risk that an issuer or other counterparty to an investment will not fulfill its obligation to the University. To reduce the University’s exposure to credit risk the weighted average credit quality of the University’s operating and fixed income endowment portfolios is required to be AA or Aa as rated by Standard & Poor’s or Moody’s, respectively.

Concentration of Credit Risk—Concentration of credit risk is the risk of loss attributable to the magnitude of a government’s investment in a single issuer. Except for Treasury or Agency debentures, pass-throughs or REIMICs, no more than 5% of the operating and fixed income endowment portfolios are invested in securities of a single issuer.

(3) Capital Assets

Capital assets at June 30, 2005 and 2004 are summarized as follows:

	<u>2005</u>	<u>2004</u>
Infrastructure and land improvements	\$ 38,523,144	37,174,704
Buildings and leasehold improvements	498,388,803	481,658,340
Equipment and software	243,319,617	240,437,335
Construction in progress (nondepreciable)	<u>76,727,165</u>	<u>45,843,190</u>
	856,958,729	805,113,569
Less accumulated depreciation	<u>423,593,638</u>	<u>401,159,164</u>
	<u>\$ 433,365,091</u>	<u>403,954,405</u>

**STATE UNIVERSITY OF IOWA,

June 30, 2005 balances	<u>\$ 25,209,265</u>	<u>268,821,968</u>	<u>129,562,405</u>	<u>423,593,638</u>

At June 30, 2005, construction in progress related to various projects throughout the UIHC. The estimated cost to complete the current phase of equipment and projects under construction at June 30, 2005 is \$30.5 million. Other projects at June 30, 2005, with an estimated cost of \$286.0 million, have been committed to by the Board and/or UIHC; however, construction contracts had not been signed as of such date. These projects are anticipated to be funded through existing designated funds, cash provided by future operations and/or the issuance of additional long-term debt.

Cost of capital assets includes interest during the construction period for qualifying projects. Interest costs capitalized for the years ended June 30, 2005 and 2004 were \$1,484,638 and \$1,486,482, respectively.

The Hospital Revenue Bonds are special obligations of the Board of Regents payable solely out of Hospital Income. "Hospital Income" is defined as the gross income and funds received by the Hospital System, including the proceeds of rates, fees, charges, and payments for healthcare provider activities for patient care services rendered by the University's hospitals, clinics, laboratories and ancillary facilities, after deduction of Current Expenses. Hospital Income does not include State appropriations to the University or Hospital System. So long as the Bonds or Parity Bonds remain outstanding, the entire Hospital System income and revenues shall be deposited to the Revenue Fund and shall be disbursed to the following funds in the following order: (1) the operation and maintenance fund, (2) the sinking fund, (3) the reserve fund,

**STATE UNIVERSITY OF IOWA,
UNIVERSITY OF IOWA HOSPITALS AND CLINICS**

Notes to Financial Statements

June 30, 2005 and 2004

and (4) the system fund. The reserve fund requirement is equal to the maximum annual amount of the principal and interest coming due on the bonds and any parity bonds, or \$1,753,500.

The Telecommunications Facilities Revenue Bonds (Telecommunications Bonds) represent UIHC's share of the remaining outstanding bonds that were issued by the State University of Iowa to pay costs of constructing and installing communications facilities and equipment on the University campus. Monthly payments are required to be made to various sinking funds for payment of principal and interest. A portion of the monthly payments is supported by UIHC.

Scheduled principal and interest payments on the bonds for the next five years and five-year increments thereafter are as follows:

	Principal	Interest
Year ending June 30:		
2006	\$ 1,396,205	1,453,806
2007	1,333,435	1,404,388
2008	1,385,960	1,352,072
2009	1,442,413	1,296,164
2010	1,500,210	1,236,436
2011 through 2015	7,582,362	5,191,313
2016 through 2020	5,530,725	3,682,201
2021 through 2025	6,205,000	2,349,794
2026 through 2029	6,200,000	639,500
	\$ 32,576,310	18,605,674

Capital Lease Obligations

The following is a schedule by year of future minimum payments required:

Year ending June 30:	
2006	\$ 1,036,957
2007	32,723
2008	4,843
2009	1,695
2010	865
Total minimum payments required	\$ 1,077,083

**STATE UNIVERSITY OF IOWA,
UNIVERSITY OF IOWA HOSPITALS AND CLINICS**

Notes to Financial Statements

June 30, 2005 and 2004

(5) Other Long-term Liabilities—Early Retirement Benefits Payable

UIHC participates in the University's early retirement program. Subject to the approval of the director and chief executive officer of UIHC, an eligible employee may elect to receive early retirement incentives. The early retirement program generally provides certain life insurance and healthcare benefits until the employee reaches age 65. Retirees may continue participation after age 65 at their own cost. Eligible employees include faculty, professional—scientific employees and merit system employees who have been employed by the Board for at least 15 years and are between 57 and 63 years old. Benefits under the early retirement plan are internally accounted for in the University's benefits pool and are paid by UIHC through the annual assessment paid to the pool. The plan was terminated in 2002 and all eligible employees who were interested in participating in the plan were required to elect participation in 2003. UIHC accrues an estimated benefit liability when an employee elects to participate in the plan and, at June 30, 2005 and 2004, UIHC has accrued \$3,686,984 and \$5,512,137, respectively, for these benefits in other current liabilities and other long-term liabilities.

(6) Retirement Benefit Plans

Substantially all UIHC employees meeting eligibility requirements participate in the University of Iowa Retirement Plan (the Plan). The Plan is a defined contribution retirement plan providing benefits through the Teachers Insurance and Annuity Association and the College Retirement Equity Fund (TIAA-CREF). UIHC contributions to the Plan are 10% of employee compensation after the first five years of employment. During the first five years of employment, UIHC's contribution is 6.67% of the first \$4,800 of compensation and 10% of the balance of employee compensation. Employees are required to contribute an amount equal to 50% of UIHC's contribution. All contributions to the Plan are immediately 100% vested.

Eligible employees not electing to participate in the Plan are required to participate in the Iowa Public Employees' Retirement System (IPERS), a multiple employer, cost-sharing public employees' retirement system.

The University internally accounts for employee benefits using a benefits pool. Each department, including UIHC, is assessed a total amount to be paid into the pool covering all employee benefits, which approximated \$22.0 million and \$20.6 million for contributions to TIAA-CREF and IPERS in 2005 and 2004, respectively.

(7) Risk Management

The University, or the State of Iowa on behalf of UIHC, self-insures workers' compensation, unemployment, medical, and dental benefits for eligible employees, automobile, professional, and general liability. UIHC pays the employer portion of the costs related to workers' compensation, unemployment, and medical and dental benefits. The provision for estimated medical malpractice claims includes estimates of the ultimate costs for both reported claims and claims incurred but not reported. UIHC purchases commercial property insurance for its facilities including business interruption insurance. UIHC also purchases commercial life and disability insurance for eligible employees as part of the University's benefit program.

UNIVERSITY OF IOWA HOSPITALS AND CLINICS**

Notes to Financial Statements

June 30, 2005 and 2004

UIHC's portion of the health insurance liability, which is included in accounts payable and accrued expenses, is approximately \$2,211,066 and \$2,121,020 as of June 30, 2005 and 2004, respectively, as follows:

	<u>2005</u>	<u>2004</u>
Liability for unpaid health care claims at beginning of year	\$ 2,121,020	3,422,000
Healthcare expenses incurred during the year	27,003,631	22,205,083
Healthcare payments to the University during the year	<u>(26,913,585)</u>	<u>(23,506,063)</u>
Liability for unpaid healthcare claims at end of year	<u>\$ 2,211,066</u>	<u>2,121,020</u>

Board institutions cooperatively self-insure for automobile liability up to \$250,000. Losses in excess of \$250,000 are self-insured by the State of Iowa.

The State Appeals Board, subject to the advice and approval of the Attorney General, is authorized to settle tort claims against the State of Iowa as set forth in Chapter 669 of the Code of Iowa. Tort liability claims settled in excess of \$5,000 must have the unanimous approval of all the members of the Appeals Board, the State Attorney General, and the District Court of the State of Iowa for Polk County. By interagency agreement, tort liability claims (including professional liability) under \$5,000 may be administered by the University, subject to a maximum expenditure of \$100,000 per year. All other tort claims are paid from the State of Iowa's general fund and are not an obligation of UIHC.

The State maintains an employee fidelity bond where the first \$100,000 in losses is the responsibility of UIHC. Losses in excess of the \$100,000 deductible are insured up to \$10,000,000. Coverage extends to all UIHC employees.

(8) Transactions With Related Parties

UIHC receives certain administrative services, utilities, and other general services from the University. The services and support costs include amounts due to the University's College of Medicine for support of graduate medical education, specific clinical services, and other services. These services are charged to UIHC at the approximate cost incurred by the servicing unit. For the years ended June 30, 2005 and 2004, UIHC expensed approximately \$79.5 million and \$75.7 million, respectively, for these administrative services, utilities, and other services and support requirements. At June 30, 2005 and 2004, approximately \$801,000 and \$378,000, respectively, were due to the University for services and support.

UIHC also provides certain administrative services to units of the University. These services include billing, collection, and other physician practice-related clinic overhead expenses. These services are charged to units of the University at the approximate cost incurred by the servicing unit. For the years ended June 30, 2005 and 2004, UIHC received revenue from these units of approximately \$27.3 million and \$23.6 million, respectively, for these services.

UNIVERSITY OF IOWA HOSPITALS AND CLINICS**

Notes to Financial Statements

June 30, 2005 and 2004

UIHC and the College of Medicine have formed a nonprofit corporation, University of Iowa Health System (UIHS), to enhance and support the educational missions of the UIHC and the College of Medicine, particularly as these missions apply to clinical activities and statewide and multi-state network development activities. UIHC paid UIHS for certain administrative and other general services in the amount of \$0.7 million for the years ended June 30, 2005 and 2004. UIHC also transferred \$0.9 million to the University's College of Medicine in support of clinical programs for the years ended June 30, 2005 and 2004.

The Faculty Practice Plan (the Practice Plan) is a clinical component of the University's College of Medicine. The UIHC performs billing and collection services for the Practice Plan. At June 30, 2005 and 2004, accounts receivables outstanding for the Practice Plan were \$19,029,004 and \$21,199,211, respectively. These amounts are also included in due to related parties at June 30, 2005 and 2004.

(9) Net Patient Service Revenue

UIHC has agreements with third-party payors that provide for payments to UIHC at amounts different from its established rates. A summary of the payment arrangements with major third-party payors follows:

Medicare

Inpatient acute care services and outpatient services rendered to Medicare program beneficiaries are paid at prospectively determined rates. These rates vary according to a patient classification system that is based on clinical, diagnostic, and other factors.

Iowa Medicaid

Inpatient and outpatient services rendered to Medicaid program beneficiaries are primarily paid at prospectively determined rates per discharge. Physician clinic services are paid based on fee schedule amounts.

Revenue from Medicare and Medicaid programs accounted for approximately 26% and 16%, respectively, of UIHC's net patient revenue for the year ended 2005, and 26% and 13%, respectively, of UIHC's net patient revenue for the year ended 2004. Laws and regulations governing the Medicare and Medicaid programs are extremely complex and subject to interpretation. As a result, there is at least a reasonable possibility that recorded estimates will change by a material amount in the near term. The 2005 net patient service revenue increased approximately \$442,000 due to the removal of allowances previously estimated that are no longer necessary as a result of final settlements and years that are no longer subject to audits, review, and investigations. The 2004 net patient service revenue decreased approximately \$2,400,000 due to prior year retroactive adjustments in excess of amounts previously estimated.

UIHC has also entered into payment agreements with certain commercial insurance carriers, health maintenance organizations, and preferred provider organizations. The basis for payment to UIHC under these agreements includes prospectively determined rates per discharge, discounts from established charges, and prospectively determined daily rates.

UNIVERSITY OF IOWA HOSPITALS AND CLINICS**

Notes to Financial Statements

June 30, 2005 and 2004

Net patient service revenue, as reflected in the accompanying statements of revenues, expenses, and changes in net assets, consists of the following:

	2005	2004
Gross patient charges:		
Inpatient charges	\$ 748,118,368	660,359,196
Outpatient charges	554,153,048	507,618,950
Total gross patient charges	1,302,271,416	1,167,978,146
Less:		
Deductions from gross patient charges:		
Contractual adjustments—Medicare, Medicaid, and other	664,534,018	564,448,275
Net patient service revenue	\$ 637,737,398	603,529,871

Included in net patient service revenue are certain amounts received from the State of Iowa in support of indigent care. State reimbursements are received annually to provide acute patient care, psychiatric, and developmental patient care services to patients. Patients are referred from a variety of sources such as their home county, state institutions, and school districts. For the years ended June 30, 2005 and 2004, amounts received from the State of Iowa were \$40,690,905 and \$40,795,241, respectively.

UIHC also receives supplemental disproportionate share and indirect medical education patient care reimbursement allowances from the State of Iowa's Medicaid program. UIHC is obligated to transfer funds to the State of Iowa to the extent of these supplemental receipts. For the years ended June 30, 2005 and 2004, UIHC received \$53,347,355 and \$48,289,764, respectively, in supplemental receipts and paid the same amount to the State of Iowa. These amounts have been excluded from revenues and expenses in the accompanying financial statements.

(10) Charity Care

The State requires UIHC to provide patient care to residents of Iowa under a state-supported indigent patient care program. Services are provided to all eligible patients at reduced or no costs. Charity care is also provided to certain other patients in accordance with UIHC's charity care policy.

Charity care for the years ended June 30, 2005 and 2004 at established hospital rates is summarized as follows:

	2005	2004
Indigent patient care	\$ 91,278,721	80,584,872
Other charity patient care	4,377,494	1,781,768
Total gross revenue foregone	\$ 95,656,215	82,366,640

Notes to Financial Statements

June 30, 2005 and 2004

(11) Disclosures About the Fair Value of Financial Instruments

Financial instruments are described as cash, contractual obligations, or rights to pay or receive cash. The fair value for certain financial instruments approximates the carrying value because of the short-term maturity of those instruments, which include receivables, accounts payable, accrued liabilities, estimated net settlements to third-party payors, and other current liabilities.

Investments are recorded at fair value. The estimated fair value of the long-term debt was calculated by discounting future cash flows using borrowing rates currently available for debt of similar maturity. Carrying amount and estimated fair value of long-term debt at June 30, 2005 were \$32,576,310 and \$35,496,147, respectively, and at June 30, 2004 were \$33,727,745 and \$36,874,986, respectively. Other assets and obligations are insignificant and carrying amounts are assumed to approximate fair value.

Fair value estimates are made at a specific point in time based on relevant market information. These estimates are subjective in nature and involve uncertainties and matters of significant judgment and, therefore, cannot be determined with precision. Changes in assumptions could significantly affect the estimates.

(12) Concentrations of Credit Risk

UIHC grants credit without collateral to its patients, most of who are Iowa residents and are insured under third-party payor agreements. The mix of receivables from patients and third-party payors at June 30, 2005 and 2004 was as follows:

	2005	2004
Commercial pay	31%	32%
Medicare	20%	17%
Self-pay	5%	16%
Medicaid	17%	11%
Blue Cross/Blue Shield	24%	21%
Other	3%	3%
	100%	100%

(13) Operating Leases

UIHC uses certain capital assets under noncancelable operating leases. In most cases, management expects that, in the normal course of operations, the leases will be renewed or replaced by other leases. Total rent expense under operating leases for the years ended June 30, 2005 and 2004 was \$4,610,838 and \$4,770,635, respectively.

**STATE UNIVERSITY OF IOWA,
UNIVERSITY OF IOWA HOSPITALS AND CLINICS**

Notes to Financial Statements

June 30, 2005 and 2004

The following is a schedule by year of future minimum rental payments required under noncancelable operating leases as of June 30, 2005:

Year ending June 30:		
2006	\$	1,749,228
2007		1,644,288
2008		1,614,518
2009		1,608,564
2010		<u>1,608,564</u>
Total minimum payments required	\$	<u><u>8,225,162</u></u>

(14) Accounts Payable and Accrued Expenses

Accounts payable and accrued expenses reported as current liabilities at June 30, 2005 and 2004 consisted of the following amounts:

Accounts payable and accrued expenses	2005	2004
Payable to employees (including payroll taxes)	\$ 53,367,935	51,408,700
Payable to suppliers	18,406,053	21,310,159
Other	<u>9,534,630</u>	<u>7,832,270</u>
Total accounts payable and accrued expenses	<u>\$ 81,308,618</u>	<u><u>80,551,129</u></u>

(15) Law and Regulations

The healthcare industry is subject to numerous laws and regulations of federal, state, and local governments. These laws and regulations include, but are not necessarily limited to, matters such as licensure, accreditation, government healthcare program participation requirements, reimbursement for patient services, and Medicare and Medicaid fraud and abuse. Violations of these laws and regulations could result in expulsion from government healthcare programs together with the imposition of significant fines and penalties, as well as significant repayments for patient services previously billed. Management believes that UIHC is in compliance with government laws and regulations as they apply to the areas of fraud and abuse. While no regulatory inquiries have been made which are expected to have a material effect on UIHC's financial statements, compliance with such laws and regulations can be subject to future government review and interpretation, as well as regulatory action unknown or unasserted at this time.

(16) New Accounting Pronouncements

Effective July 1, 2005, UIHC will adopt the provisions of Financial Accounting Standards Interpretation No. 47, *Accounting for Conditional Asset Retirement Obligations*, which addresses financial accounting and reporting for obligations associated with the retirement of tangible long-lived assets and the associated retirement costs. UIHC is currently assessing the effect of this statement on the financial statements.
